## MOVE-UP - International Webinar “Reaching out to adult learners: key success factor for upskilling pathways”

**MOVE-UP initiative aims to improve outreach to potential adult learners in Europe and support participation in upskilling pathways**

Our new EU-funded MOVE-UP project is developing a flexible and quality upskilling pathway for unemployed women who are dedicating most of their time and efforts to the role of mother and who are in need to (re) join education activities and the job market.

One of the focus of the consortium is also to improve outreach strategies and activities to positively and successfully engage with potential adult learners and improve their participation in upskilling pathways in a broader sense.

If you are interested in supporting adults to re-join education activities and to enhance Personal Social and Learning competences as well as basic skills (literacy, digital, financial etc.), **we invite you to join us for our first MOVE-UP Alliance International Webinar on 16 November at 16.00 CET “Reaching out to adult learners: key success factor for upskilling pathways” to give us feedback on our outreach strategy and share your experiences and good practices on how to improve adult participation in education across Europe.**

**Webinar programme and registration are available on the MOVE-UP website**
